

Alexandr Rîcov

Senior Frontend Engineer | React · TypeScript · Frontend Architecture · Accessibility

Bucharest, Romania · +40 726 651 605 · alexandr.ricov@gmail.com · linkedin.com/in/alexandr-ricov

Open to remote roles and hybrid roles in Bucharest. EU work authorization.

PROFILE

Senior Frontend Engineer building production web applications with React and TypeScript.

I specialize in frontend architecture and complex UI systems, with a focus on reusable components, design systems, responsive interfaces, accessibility and internationalization.

I've worked across fintech, healthcare, AI and Web3 products, often taking ownership of the frontend from architecture and technical decisions through hands-on implementation and production launch.

My experience includes building complex financial applications, multi-step healthcare workflows, multilingual products, a browser-extension wallet and AI-powered interfaces. I've also introduced testing practices from scratch, built type-safe internationalization systems and worked extensively with accessibility and WCAG.

TECHNICAL SKILLS

Core React · TypeScript · JavaScript · HTML5 · CSS3 / SCSS

Architecture & UI Frontend architecture · Component architecture · Design systems · Responsive UI · Theming · Semantic HTML · Internationalization (i18n) · Accessibility (WCAG / a11y)

Frameworks & Libraries React Router · Redux · TanStack Query · Next.js · Tailwind CSS · Storybook · Electron

APIs, Build & Testing REST · GraphQL · Vite · Webpack · ESLint · Prettier · Git · Vitest · Testing Library

Web3 ethers.js · viem · wagmi · wallet integration

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — Digital M.O.B.

Jul 2020 – Sep 2026 · Bucharest, Romania

Product engineering studio building production applications for international clients and startups.

- Primary frontend engineer across multiple production products in fintech, AI and Web3, defining frontend architecture while remaining hands-on with production React and TypeScript code.
- Built reusable component systems, responsive UI, theming, internationalization and maintainable state-management patterns.
- Worked directly with clients to clarify requirements, evaluate technical options and turn product designs into production applications.

SELECTED PROJECTS

DRE App (2026) — Global financial application

- Led frontend architecture across a 39-route React application; built a 7-locales internationalization system with ~980 translation keys per locale, with compile-time key validation and CI parity checks.
- Integrated authentication, ERC-4337 account abstraction and cross-chain routing. Current production Lighthouse accessibility: 96/100.

Taunt Bet (2026) — Data-heavy prediction platform

- Led frontend architecture and built reusable UI and design-system foundations.
- Established the frontend testing practice from scratch: 244 test cases across 17 Vitest suites; integrated five Solana Anchor programs.

Daisy (2025–2026) — Generative AI media platform

- Built production React and TypeScript UI, reusable component architecture and complex product workflows.

Seek3rWallet (2022–2024) — Self-custodial browser-extension wallet

- Delivered much of the frontend independently across a 44-route application with a large reusable component system, 306 design tokens, light/dark/system themes and EVM, Bitcoin and ABlock integrations.

Additional products: **Orange Standard** (fintech) · **Threshold Network / tBTC** (multi-chain Bitcoin dApp).

Senior Frontend Engineer — Melio

Mar 2026 – Jun 2026 · Bucharest, Romania · Part-time alongside Digital M.O.B.

Preventive-healthcare startup providing personalized screening plans and laboratory-test interpretation for the Romanian market.

- Sole frontend engineer, taking the product from an initial visual direction to production launch in under four months; designed the frontend architecture and reusable UI system.
- Built the complete React and TypeScript application, including five multi-step clinical flows spanning 47 screens, responsive UI, light/dark theming, bilingual support and accessibility.
- Contributed to backend implementation, payment processing and laboratory-data integrations. Production Lighthouse: **100 Accessibility / 100 Best Practices / 100 SEO** on the public site.

Senior Frontend Engineer — ConsenSys

Mar 2017 – Jun 2020 · Cluj-Napoca, Romania

- Led frontend delivery across a team of four engineers while remaining hands-on with architecture and production development.
- Built React applications with complex state management, reusable UI components and offline-first capabilities; mentored engineers and reviewed code.
- Worked directly with clients on requirements and technical solutions, including Breaker (Electron desktop application) and Tokit (rights-management gateway).

EARLIER EXPERIENCE

Frontend JavaScript Engineer — MCRO · 2016 – 2017 · Cluj-Napoca, Romania

Built Uniqlo's mobile web application with React, including server-side rendering, Redux, GraphQL, Webpack and SCSS.

Frontend JavaScript Engineer — AROBS Software · 2013 – 2015 · Chişinău, Moldova

Developed web applications and a rights-management platform for Warner Music Group using JavaScript, AngularJS, REST APIs and CSS / LESS.

Frontend Developer — Fruitware · 2012 – 2013 · Chişinău, Moldova

Developed responsive JavaScript and AngularJS web applications.

EDUCATION

Moldova State University

Master's Degree — Software Technology Products · 2012 – 2014

Bachelor's Degree — Informational Management · 2005 – 2009

CERTIFICATION

Digital Accessibility School — Accessibility Unity · Sep – Dec 2023
